Now, extend the same approach to the rest of the human skeleton. Aside from the skull, the two areas of the skeleton that take up a largest mass are the **ribcage**, and the **pelvis**.

Both can be represented through oval shapes, but some artists draw them as boxes or use shapes closer in form to the actual bones.

Draw me like one of your French Skeletons...

Get a feel for how different poses look using simple construction lines. Here's an exercise that can help:

- Get some tracing paper and put it over drawings from your favorite art books or comics.
- Break down their work into lines and shapes. Deconstruct it and try and figure out what the artist was thinking.
- Try and use their methods in your next drawing. Over time you'll get used to the process, until drawing construction lines for the body becomes second nature.

It's almost like "thinking" on paper as you draw. The next part is where things become more solid and we put the meat on the bones...
